

SIGNMAX® UV-MAX GLOSS OPTICAL LAMINATING FILM

Signmax® UV-MAX is a premium polymeric optical PVC laminating film designed to provide true UV filtering and protection for up to 4 years. Protect your images and keep your customer prints looking crisp and new for longer. It's suitable for all intermediate digital window films, including perforated window films. The super clean film won't distort colours or images like typical calendared overlaminates. Premium polymeric means less shrink than monomeric PVC laminates.

Features

- Brilliant Optical Clarity
- Tested and Proven Strong UV Filtering
- 4 Year Durability

Applications

- Medium Term Window Decals
- Signage on Windows Subject to Strong UV
- Perforated Window Film

Material Sizes
